Place Collection

Place Design

The Place tandem seating system delivers comfort, practicality and elegance.

With integrated power and USB at every seat, generous tablet arms, drink holders, under-seat storage – and plenty of personal space – allows travelers work, read, game or consume media in style.

With Place, every seat is the best seat in the house.

High Performance

Safety and Security

Place's open, under seat design improves waiting area sightlines for airport security personnel. The seating system exceeds ANSI-BIFMA standards, assuring passenger safety. Place's solid structure resists tipping, while unit legs are positioned inboard to eliminate obstacles.

Fire Rating

Place passes the most rigid fire standards in North America (CA Tech 117 & 133) and in Europe (BS-5852).

Installation and Configuration

Place is designed for flexibility and ease of installation, including floor mounting. Many configurations are possible, including straight rows, corners and u-shapes in both single and back-to-back rows. Our locally trained installers ensure fast and continuous service.

Easy Maintenance

Floor cleaning becomes a simpler task due to Place's minimal floor contact points and ample under room under the seat.

Arms & Legs

Arms and legs are made from solid die-cast aluminum and are satin polished with bright accents.

Place Cluster

Place Cluster

Six seat Place Cluster units create inviting waiting areas that offer increased personal space and table surface. Increased personal space results in higher seat utilization, while the large central table provides sufficient surface for all occupants to share.

Power Access

Optional power access creates a temporary workstation. Power outlets and USB ports can be accessed from a seated position, just under the table's edge. Cords from portable electronic devices hang under the tabletop, out of the way. Logos can be embroidered on the seat backs to identify power access and Wi-Fi availability.

Environmental Sustainability

We care about the full life cycle of our products. Arconas delivers the world’s most environmentally friendly seating and furniture for passenger terminals and public spaces.

We were one of the first manufacturers in North America to introduce the use of injection-molded, CFC-free, cold-cured foam. Our foam and metal components are 100% recyclable. Our products meet the requirements of ANSI/BIFMA Emissions Standards M 7.1 2011, are low V.O.V., and do not contribute to poor indoor air quality.

Our products can also contribute toward your building achieving LEED credits.
