Flyaway Collection

↑ Los Angeles International Airport

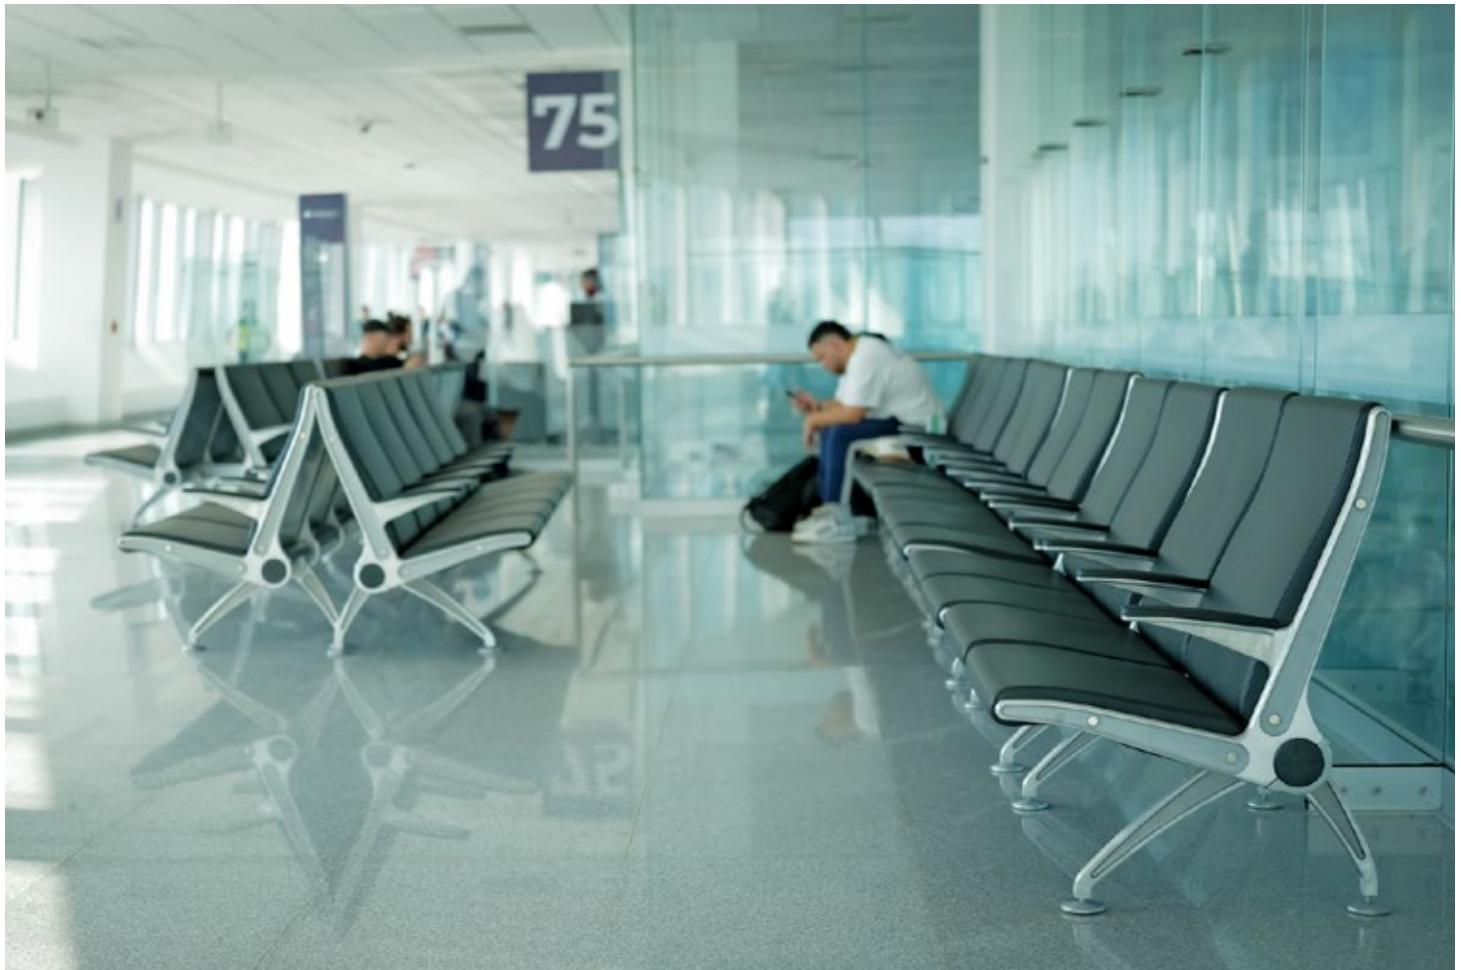

Flyaway is a public seating system crafted for today's busy airports and commercial spaces. Combining high performance with timeless design and exceptional comfort, Flyaway elevates every passenger experience.

Flyaway Design

Flyaway's clean, graceful lines integrate a robust structure. Created by award-winning designer Douglas Ball for high-impact settings, the contemporary Flyaway emphasizes user comfort. Ergonomically contoured lumbar support, a higher backrest and substantial cushioning provide superior comfort for extended wait times in international and hub airports and public waiting areas.

Double Cluster

High Performance

Safety and Security

Flyaway's open, under seat design improves waiting area sightlines for airport security personnel. The seating system exceeds ANSI-BIFMA standards, assuring passenger safety. Flyaway's solid structure resists tipping, while unit legs are positioned inboard to eliminate obstacles.

Fire Rating

Flyaway passes the most rigid fire standards in North America (CA Tech 117 & 133) and in Europe (BS-5852).

Installation and Configuration

Flyaway is designed for flexibility and ease of installation, including floor mounting. Many configurations are possible, including straight rows, corners and u-shapes in both single and back-to-back rows. Our locally trained installers ensure fast and continuous service.

Easy Maintenance

Floor cleaning becomes a simpler task due to Flyaway's minimal floor contact points. The low maintenance cushion design is nearly self-cleaning and can easily be reupholstered on-site. Flyaway's modular design and minimum number of parts ensures trouble-free maintenance over the unit's lifetime.

Slipcover Upholstery System

Seat and back cushions are easily replaced on-site with Flyaway's unique slipcover upholstery system.

Arms & Legs

Arms and legs are made from solid die-cast aluminum and are satin polished with bright accents.

Power

inPower™ Flex 3

inPower™ flex 3 easily mounts below seats (must be in between seats) and tables and provides enough outlets to charge up to 4 devices at once. Each module is tested to UL certifications and has many built-in safety features.

inPower™ flex 3 sockets can be specified to meet country voltage requirements world-wide.

North American module shown
*European and UK Modules available

Cable Management Device (CMD)

The CMD is designed to hide the slack from inPower™ flex 3 cords and to prevent tampering. The device also provides one exit point for the power cord anywhere along the beam.

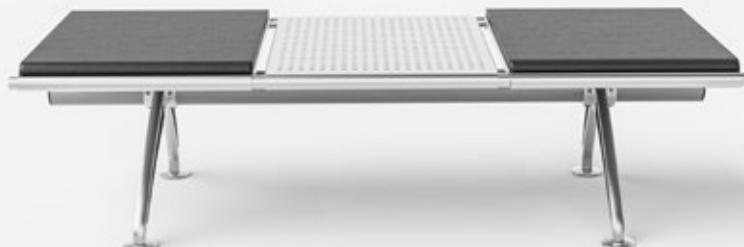

Flyaway Bench

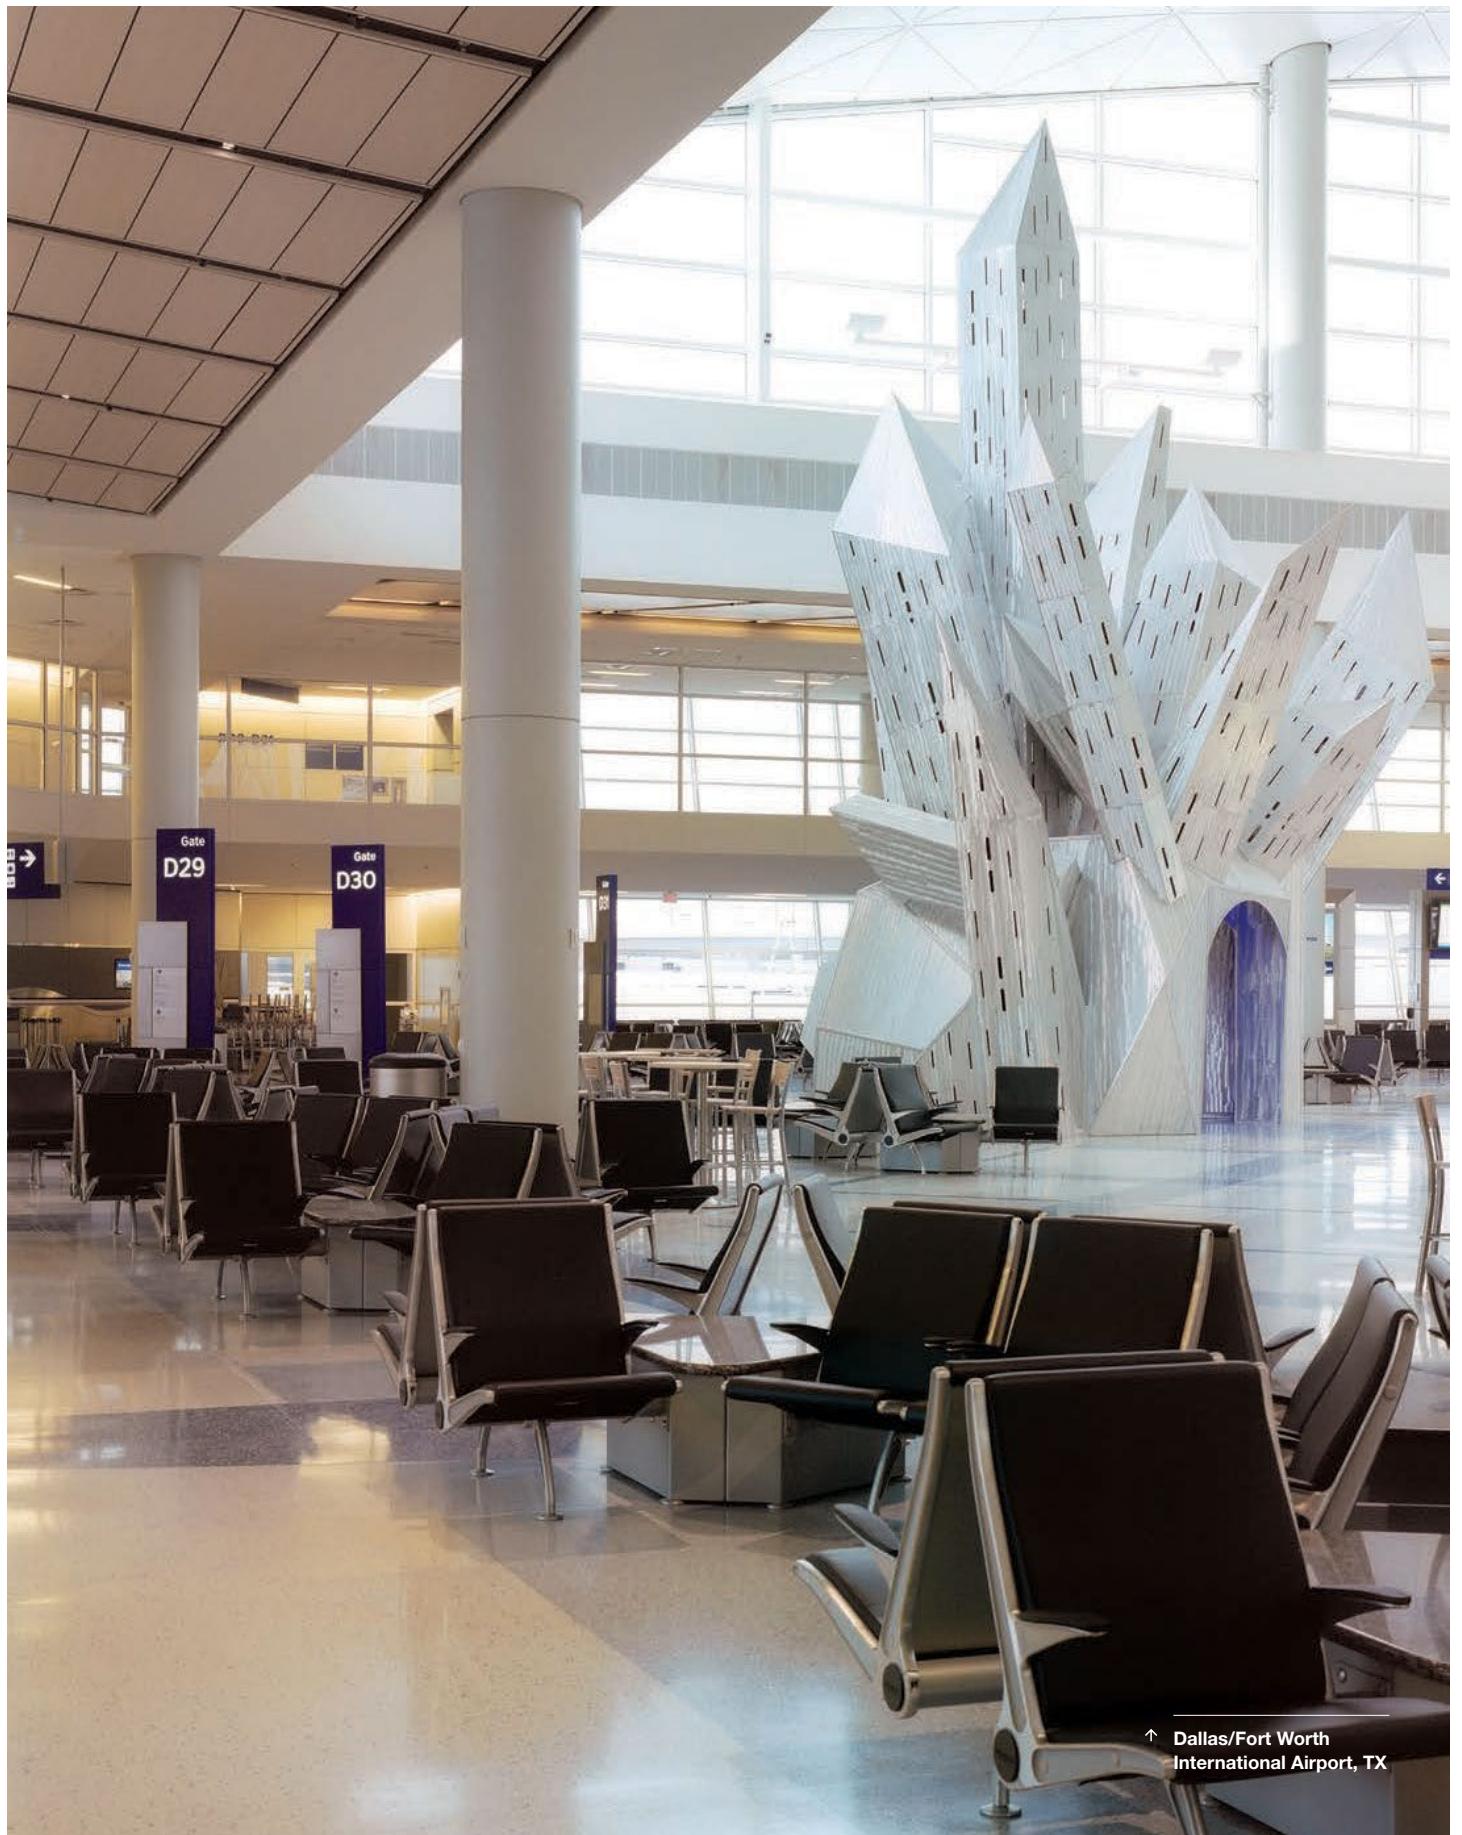

Flyaway Bench

The Flyaway Bench is important in transitional public spaces for people who need a quick rest, are waiting for others, or have difficulty walking long distances. They are also a great choice for spaces that require clear sight lines.

The Flyaway bench is comfortable, durable, timeless, and offers exceptional seating for shorter wait periods. Configurations are available in 2 to 5 seat linear units. Complete the look with upholstered pads with your choice of vinyl or leather.

Flyaway Cluster

↑ Dallas/Fort Worth
International Airport, TX

Flyaway Cluster

Flyaway Cluster

Six seat Flyaway Cluster units create inviting waiting areas that offer increased personal space and table surface. Increased personal space results in higher seat utilization, while the large central table provides sufficient surface for all occupants to share.

Seating Layouts

Clusters can be ganged to form semi-circular seating arrangements suitable for families and small groups to gather. Combine Cluster units with linear Flyaway seating to create further interest.

Power Access

Optional power access creates a temporary workstation. Power outlets and USB ports can be accessed from a seated position, just under the table's edge. Cords from portable electronic devices hang under the tabletop, out of the way. Logos can be embroidered on the seat backs to identify power access and Wi-Fi availability.

Environmental Sustainability

We care about the full life cycle of our products. Arconas delivers the world's most environmentally friendly seating and furniture for passenger terminals and public spaces.

We were one of the first manufacturers in North America to introduce the use of injection-molded, CFC-free, cold-cured foam. Our foam and metal components are 100% recyclable. Our products meet the requirements of ANSI/BIFMA Emissions Standards M 7.1 2011, are low V.O.V., and do not contribute to poor indoor air quality.

Our products can also contribute toward your building achieving LEED credits.

1. Beam

Formed steel, contains up to 30% recycled material

3. Back pans

Formed steel, contains up to 30% recycled material

2. Seat brackets / Arms / Legs / Glides

Solid die-cast aluminum, contains up to 70% recycled material

4. Upholstery

Vinyl, Polyurethane, Faux Leather, Leather or C.O.M.
