Solid Surface Tabletop and Side Panel Finishes

Care and Maintenance

RESISTANCE TO SCRATCH

Corian® Solid Surface will still look and perform like a new installation because it can be repaired. However, always use a cutting board for food preparation and do not place hot cookware directly on a Corian® surface to keep the surface looking new.

MINIMAL MAINTENANCE

Daily cleaning: ammonia-based cleaners, solid surface cleaners, or soap and water with Soft Scrub are recommended.

Spills should be wiped up immediately and left completely dry.

NOTE:

High gloss finishes will require professional tools to restore the high gloss finish after a stain or scratch removal.

STAINS AND SCRATCHES

1. Renew the surface using an abrasive pad and water.
2. Wet the sample, pad, and wash using a circular motion for 30 seconds. Do not apply excessive pressure.
3. Dry the sample and observe to see if the stain has been removed. Repeat steps 2 and 3 until the stain has been removed.

RECOMMENDED CLEANSERS

	Most Dirt & Residue	Removing Hard Water Marks	Disinfecting	Blotchy Appearance or Fine Scratches	Stains and Scratches
Ammonia-based cleaner	✓				
Soap and water	✓				
Solid surface cleaners	✓		✓		
Dilute household bleach (1:100)		✓			
Hard Water Marks Cleaners	✓				
Mild abrasive liquid cleansers					

AVOID CHEMICALS

- **NO** Strong chlorinated solvents
- **NO** Alkaline cleaners, such as nail polish, acetone, oven cleaner, bleach, drain cleaners
- **NO** Concentrated acids such as sulfuric and hydrochloric acids
- **NO** Window cleaners
- **NO** Disinfectants and sterilants such as disinfecting wipes, alcohol-based hand sanitizers
- **NO** Rubbing alcohol mixed with bleach to create chloroform
- **NO** Methylene chloride such as paint removers
