

# All of Avro's materials are recyclable.

**75%**  
Recycled material

## Seat Shell

Polypropylene Composite

Avro's seating shells are composed of 75% recycled material. At the end of their lifespan, they can be recycled to create a multitude of items such as dishware, clothing, industrial fibers, containers, compost bins, storage racks and more.

**100%**  
Recyclable material

## Legs, Arms, Brackets

Die-Cast Aluminum

Arms, legs, and brackets contain recycled material and 100% of the die-cast aluminum can be recycled.

## Beam

Extruded Aluminum

Beams contain pre-consumer recycled material and 100% of beam material can be recycled.

# Avro's design, production and distribution processes are environmentally friendly.

## **KNOCKDOWN SHIPPING**

Avro's materials are shipped knocked down for efficient and economical shipping, and engineered for easy on-site assembly, ensuring low carbon emissions.

## **REPLACEABLE AND RECYCLABLE**

All of Avro's components are designed to be easily replaceable to minimize waste and maximize Avro's lifespan.

At the end of their lifespan, Avro's materials can be reused or recycled.
