

SETTLE

SPACE FOR ENCOUNTER

Settle down, get comfy, and engage with colleagues. With its soft shapes and high quality materials, Bene's upholstered furniture range brings a homely feel to the office. SETTLE consists of individual furniture elements as well as optional modular components that can be combined to create a wide variety of different settings. An optional high backrest can be added to provide additional screening and to incor-

porate a work ledge to create a dynamic room setup. Integrated plug boards enable access to the network and power, allowing for media-supported collaboration. SETTLE can be used in a variety of zones and areas in modern office layouts and works perfectly in combination with other existing Bene product ranges, such as NOOXS, TIMBA, and PARCS.

BENE WORKS SUSTAINABLY

Bene plays a leading role in responsible environmental management. It is practised throughout all company divisions – from product development, procurement, production and logistics to product recycling. Bene considers ecology to be a central element of its responsible and sustainable corporate strategy. Bene sees the legal regulations as minimum requirements and strives for better and more sustainable environmental protection throughout the group. The Bene principle in environmental policy is: **Avoidance – Minimisation – Recycling – Disposal.**

SETTLE - ECOLOGICAL STANDARDS

- 99.5% recyclable
- 53.4% renewable raw materials
- 23.98% use of recycled product materials (12.53% post-consumer, 11.45%, pre-consumer)
- 18.26% use of recycled product materials that comply with LEED (12.53% post-consumer, 11.45%, pre-consumer)
- Resource-conserving product design
- Use of certified wood (chain of custody)
- Use of materials tested for presence of hazardous substances
- No PVC, chromium, lead or mercury used
- Individual parts can be sorted according to homogeneous categories
- Recyclable, with a positive contribution to the carbon footprint (average 245.2 kg CO₂)

SETTLE LEED POINTS

Leadership in Energy and Environmental Design (LEED) is a system developed by the U.S. Green Building Council to classify ecological construction. As an internationally recognised standard, LEED sets out numerous guidelines for environmentally friendly, resource-efficient, and sustainable construction. The use of SETTLE is an important contribution to LEED certification. The following criteria for this are from “LEED 2009 for Commercial Interiors”:

MR Credit 4	Recycling share	up to 2 points
MR Credit 5	Regional materials	up to 2 points
MR Credit 7	Certified wood	up to 1 point
IEQ Credit 4.5	Material with low hazardous substance content	up to 1 point
