

Pelago

Inspired by the sculptural aesthetics of the Nordic archipelago, Pelago offers a unified, modular solution for modern public spaces. With eight modules, including seating, planters, bins, and charging options, it adapts effortlessly to both compact nooks and large layouts. Easy to configure and reconfigure, and fully customizable in colour, it empowers designers to create calm, cohesive spaces that evolve with changing needs.

Warranty

Pelago: 15-year warranty.
Pelago planter and bin: 5-year warranty
Pelago gas spring (located inside bin):
2-year warranty

At the end of its lifecycle, each component can be separated and recycled separately, with the electrical parts being processed as electronic waste.

Materials & Finishes

The metal parts are made of steel and aluminium, with the aluminium containing a minimum of 75% post-consumer recycled content. All metal parts are surface-treated with a powder coating containing no chemicals on the SIN list, and can be supplied in custom RAL colours.

All wooden parts in the seating modules are made from plywood with an oak surface veneer and treated with a hard wax oil that is VOC-free and contains no chemicals on the SIN list. The hard wax oil is available in 9 standard colours and a wide range of custom colours. Armrests and table tops are made of solid oak.

The plastic components hidden inside the seat modules are made from plastic with 95% recycled content.

Maintenance & Cleanability

Our products are crafted with the highest quality and durable materials. Proper maintenance is essential to extend their lifespan and support sustainable use. To preserve the longevity and appearance of your product, regular cleaning and upkeep are recommended.

Standards & Certifications

- Möbelfakta requirements for surface durability, Category 2 (powder-coated metal)
- CE (electrical components)

Size & Measurements

Pelago offers flexibility with a variety of modular configurations for any space.

Due to natural material variations and assembly conditions, a tolerance of ± 5 mm between connecting Pelago modules should be expected.
