

ARCONAS

Hopscotch Collection

DESIGNED BY REPUBLIC OF II BY IV

Hopscotch Collection

The Hopscotch Collection is a series of innovative and streamlined modular components inspired by minimal yet playful playground sketches. Suitable for an expansive range of areas and public spaces, this seating system inspires dynamic social interactions.

Hop Bench

'Hop' is characterized by an effortless, minimalistic and sculptural design. The high performance bench features plush padding for a comfortable seating experience and a robust structure to withstand high-impact spaces. Full upholstery hugs the bench's curves and seamlessly aligns with an aluminum base.

The base for all Hopscotch collection products is available in polished aluminum or matte black finish

Surge Power Station

'Surge' is a charging station for personal electronic devices and can also be used as a table or work surface when placed beside other seating. The power station features eight USB ports, four AC receptacles, and two wireless charging spots. All power options can be accessed on either side so users can charge their devices in whichever way is most convenient.

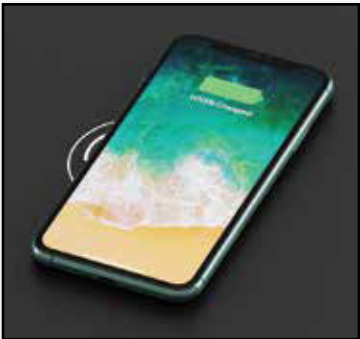

8 USB Type-A ports

4 AC Receptacles

Available in 220 volts / international versions

2 Wireless Chargers

Beacon Light Station

This triangular LED floor lamp was created to softly illuminate public spaces. The light also serves as a directional guidepost, enabling the seating system to be noticed from a distance. Beacon can be placed in a space by itself, or beside other furniture configurations to provide direction or symbolize a meeting point.

Designed by:

**REPUBLIC OF
IIBYIV**

REPUBLIC OF II BY IV is an internationally recognized product design studio founded in 2012 on the creative vision and vast industry experience of its partners, Dan Menchions and Keith Rushbrook.

The studio is fueled by passion, dedicated to constant innovation, and guided by a design philosophy that is based on quality materials, seamless joinery techniques and an adept understanding of manufacturing processes. Arconas has worked with REPUBLIC OF II BY IV for over 15 years, collaborating on high-performance furniture and design for public spaces.

- Matte black or bright polished aluminum

w	18.5"	47 cm
d	20.5"	52 cm
h	24"	61 cm
sw	14"	35.5 cm

Daisy-Chaining

All hopscotch collection products can be connected together. A conduit runs through the base of each product which hides an electrical cable. This cable allows a combination of multiple units to be daisy-chained together and powered from a single building supply source.
