

Surge Power Station

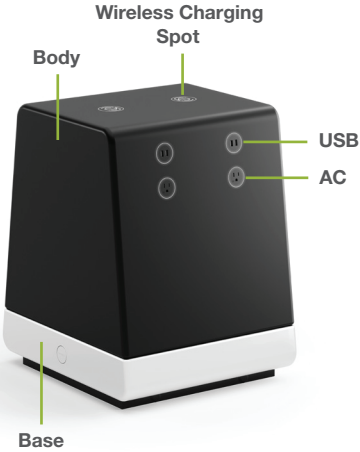

Specifications

Designer
Republic of II by IV

OVERVIEW

- SURGE is a power station that can be used as a standalone component, or in conjunction with other products in the Hopscotch collection.
- The sides of SURGE house 4 electrical ports on each face, two of which are USB-A twin ports and other two vary based on customer specific outlet type.
- The top of the SURGE have 2 Qi wireless charging points which are indicated using symbols.
- SURGE can be used as modular lounge seating and/or side tables in public spaces.

CONSTRUCTION DETAILS

Body

- The SURGE shell is made of Corian. Standard color is Deep Nocturne.
- The circular edge of each electrical socket is illuminated with a white LED light to indicate power is available.

Base

- The base is made of cast aluminum flat sides and extruded aluminum angled sides.
- The base comes standard in bright polished aluminum finish, and is also available powder coated in Arconas standard colors.
- The bottom plate is welded CRS.
- The bottom plate is fitted with 4 adjustable glides.

Assembly

- Units are shipped fully assembled.
